

## **General Administration #2**

**December 2015**

## **BETTER TOGETHER GENERAL ADMINISTRATION STUDY #2 MUNICIPAL STRUCTURE, POWERS, FUNDING, AND OPERATIONS**

### INTRODUCTION

This is the second in a series of reports on General Administration across the St. Louis City and County region. An initial report on the costs of general administration in the region revealed that, in 2014, St. Louis City, St. Louis County, and the 90 municipal governments in St. Louis County spent \$281,078,709 on general administration. On a per capita basis, a resident of the St. Louis region paid \$213.16 solely for general administration costs in 2014. In comparison, Louisville-Jefferson County, which is home to 83 municipalities but has a fully integrated regional government, spent \$95,913,714 for general administration. On a per capita basis, a citizen in Louisville-Jefferson County pays \$126.73, which is \$86.43 less per capita than the St. Louis region. If the St. Louis region were to operate at the general administration cost of Louisville-Jefferson County, the region would realize an annual savings of \$113,967,462.

However, it is not simply administrative cost that is higher in the St. Louis region. A regional comparison between the St. Louis region, Indianapolis-Marion County, and Louisville-Jefferson County reveals that the St. Louis region is far outspending other regions in local government expenses overall. The comparison showed that municipal services were provided across the 92 local governments of the St. Louis region at a cost of \$2,386,295,688 or \$1,809.71 per capita. In contrast, Indianapolis-Marion County spent \$1,121,465,888 or \$1,208.11 per capita, while Louisville-Jefferson County spent \$828,548,167 or \$1,094.76 per capita.<sup>1</sup> Given that St. Louis is the largest of the three regions, it would be expected to achieve efficiency through economies of scale. Yet that is not the case.

This report will provide information on the powers of municipalities, how they fund themselves, what services they provide, and at what cost. Additionally, potential reasons for the region's high spending on municipal services will be examined. Finally, the potential implementation of best practices will be explored, with a focus on providing efficient and effective services to all citizens in the St. Louis region.

### THE CURRENT STRUCTURE OF THE ST. LOUIS REGION

Before analyzing how local governments fund and provide municipal service delivery in the St. Louis region, it is important to understand some of the history behind the overall structure and several of the key differences between the classifications of municipal governments.

Municipal governments in St. Louis City and St. Louis County fall under four categories established by state statute: charter cities, third-class cities, fourth-class cities, and villages. The St. Louis City and County region consists of 18 charter cities, 8 third-class cities, 43 fourth-class cities, and 22 villages. The information contained in the following table provides additional

---

<sup>1</sup> <http://www.bettertogetherstl.com/wp-content/uploads/2014/06/BT-Regional-Comparison-Overview2.pdf>

information on the municipal classifications, qualifications, governance, and powers, which vary from class to class.

CLASSIFICATION	POPULATION REQUIREMENT	LEGISLATIVE BRANCH	EXECUTIVE BRANCH	MUNICIPAL GOVERNMENT POWERS
Charter Cities	None	Established and governed by charter.	Established and governed by charter.	"Any city which adopts or has adopted a charter for its own government, shall have all powers which the general assembly of the state of Missouri has authority to confer upon the city, provided such powers are consistent with the constitution of this state and are not limited or denied either by the charter so adopted or by statute. Such a city shall, in addition to its home rule powers, have all powers conferred by law" (Missouri Constitution Art. VI, 19(a)).
3rd Class Cities	3,000 - 29,999	<p>Mayor-Council: not less than 4 wards, each of which has one two council members.</p> <p>Commission: Two or four council members, elected at large to four year terms.</p> <p>City Manager: Two forms: (1) five council members, elected at large for three year terms, one selected by the others to serve as mayor for a one year term. (2) seven council members, one from each of the five wards and two elected at large.</p>	<p>Mayor-Council: Mayor elected to four year term. City Administrator available to this form of municipality.</p> <p>Commission: Mayor elected to four year term.</p> <p>City Manager: Mayor selected from among city council to serve, city council employs administrative head of city government as City Manager.</p>	<p>Both Mayor-Council and Commission: City divided in five departments (public affairs, accounts and finances, public safety, streets and public improvement, parks and public property) and responsibilities for those departments is divided among the mayor and commissioners (RSMO 78.060).</p> <p>City Manager: The council retains the duty to pass all ordinances conducive to the welfare of the city. The Council shall also provide for all offices and positions necessary to the City Manager to carry on the work of the city (RSMO 78.570). The City Manager shall be the administrative head of the government subject to the direction and supervisions of the council. It is the City Manager's job to make sure that all laws and ordinances are enforced, to exercise control of all departments and divisions of the city, to prepare and submit an annual budget (RSMO 78.610).</p>

CLASSIFICATION	POPULATION REQUIREMENT	LEGISLATIVE BRANCH	EXECUTIVE BRANCH	MUNICIPAL GOVERNMENT POWERS
4th Class Cities	500 - 2,999	Board of Aldermen: two aldermen per ward, at least two wards. Two year terms, four years if approved by voters.	Mayor, elected to a two or four year term. City Administrator available to this form of municipality	The Board of Aldermen shall "have the care, management and control of the city finances and shall have power to enact and ordain any and all ordinances not repugnant to the constitution and laws of this state," further the city is able to legislate on keeping the peace in the community, regulating businesses, public health, and general good government (RSMO 79.110.1). Those powers also include zoning powers and the ability to address public safety concerns too (RSMO 79.450.1).
Villages	Fewer than 500	Board of Trustees	Chairman	The Board of Trustees is granted statutory authority to pass ordinances in more than 40 specified areas (RSMO 80.090), may are very specific but generally fall in to some broad categories: - power to license and regulate merchants - some public health powers - zoning - fire protection, police - power to tax - power to provide for public infrastructure

The following identifies the classification of each municipality, as well as its year of incorporation.

In addition to providing classifications, the preceding table highlights the lack of any grand vision or common design in the creation of the St. Louis region. The oldest of the municipalities, Florissant, was incorporated in 1786, a year prior to the signing of the United States Constitution, while Wildwood was incorporated in 1995. The St. Louis region took shape over a period of two centuries with an additional 7 municipalities forming in the 19<sup>th</sup> century, 59 municipalities incorporating between 1900 and 1950, and 24 coming into existence between 1950 and 1995. This history of fragmented formation has its roots in everything from simple geography (with some municipalities being separated due to a previously inconvenient distance of travel) to the genesis of municipalities as instruments for the implementation of race-based restrictive covenants. The various reasons for incorporation, though quite different from one another, help to explain how the St. Louis region came to be home to a fragmented structure of 90 municipalities, St. Louis City, and St. Louis County. An understanding of this structure lends context to the unique and troubling manner in which the St. Louis region funds itself and operates at the local government level.

### REVENUE ACROSS THE ST. LOUIS REGION

The St. Louis region collects over \$2 billion in total revenue annually for the provision of municipal services. The following table details the range of top revenue streams for each municipality, St. Louis City, and St. Louis County.

MUNICIPALITY	POPULATION	TOTAL REVENUE	SALES TAX REVENUE	SALES TAX % OF TOTAL REVENUE	PROPERTY TAX REVENUE	PROPERTY TAX % OF TOTAL REVENUE	UTILITY GROSS RECEIPTS REVENUE	UTILITY TAX % OF TOTAL REVENUE	COURT FINES AND FEES REVENUE	COURT FINES AND FEES % OF TOTAL REVENUE

\*Breakdown of taxes not provided in statement of changes in fund balances. Utilized change in net position instead.

\*\*Breakdown of taxes not provided.

As the preceding table shows, the St. Louis region relies heavily on revenue from sales taxes. This phenomenon results from a combination of the absence of state restrictions and extreme regional fragmentation. This pairing results in an unsettling regional disconnect between the actual costs of government and citizens' perceptions of those costs.

The State of Missouri levies a sales tax of 4.225%. However, unlike Indiana and Kentucky, which levy flat sales tax rates of 7% and 6% respectively, Missouri currently allows for municipalities to levy local sales taxes in addition to the state sales tax rate. This was not always permitted. Prior to 1969, local sales taxes for municipalities were not authorized. The two principal revenue sources at the time for local governments were property and utility taxes.<sup>2</sup> However, in 1969, the State of Missouri began to authorize local sales taxes. Almost immediately after, 56 municipalities in St. Louis County approved a local sales tax, with many lowering their city's property tax accordingly.<sup>3</sup> Numerous additional municipal sales taxes have been added since this time.

The lack of a flat rate in Missouri, combined with the fragmentation of the St. Louis region, creates a disconnect between citizens and the actual costs of services provided to them. As St. Louis municipalities were quick to realize, because of the small size and close proximity of so many neighboring municipalities, the cost of local government could be spread to citizens of those other municipalities rather than be borne solely by their own citizenry. The passage of the first municipal sales tax and its pairing with corresponding reductions of property tax rates serves as direct proof of this model's intent. It is a model that has been perfected by many municipalities, to the detriment of the whole of the region. After all, issuing a property tax or other direct tax on your own citizens is politically unpopular, while attracting retail and spreading the cost burden across a million potential customers levies an indirect tax on a far greater pool of people, many of whom do not have a vote in that municipality's local elections.

Because of the prisoner's dilemma that is created for municipal leaders in the current system (i.e. either chase the sales tax revenue or lose out to the communities that do), the St. Louis region has gone from having *no* municipal sales tax to gathering 36.7% of its annual regional revenue from sales taxes. Sixty-nine of the ninety-two local governments in the St. Louis region count sales taxes as their number-one source of revenue. The pursuit of externally sourced municipal revenue amongst each municipality's neighbors is prolific. One need only consult Better Together's report on economic development<sup>4</sup> and tax increment financing (TIF)<sup>5</sup> for numerous examples. The result is an average sales tax rate in the St. Louis region of 8.04%. In some special taxing districts in the region, sales tax rates can eclipse 10% and rank among the highest in the country, an over 30-percent increase from Missouri's average sales tax rate of 7%.

---

\*Breakdown of taxes not provided in statement of changes in fund balances. Utilized change in net position instead.

\*\*Breakdown of taxes not provided.

Even more troubling is the inequity perpetuated, in part, by the current system of relying on local sales taxes for municipal funding. Just over 40 years ago, property taxes were one of the two primary sources for the funding of municipal government. Today, three of the ten wealthiest suburbs in the region do not levy a municipal property tax: Town & Country, Wildwood, and Des Peres. Town & Country brings in nearly 40% of its revenue (\$13,795,338) from sales tax revenue. Wildwood brings in \$7,405,774, or 50%, of its overall revenue from sales taxes. Finally, as home to West County Mall, Des Peres brings in over 60% of its revenue (\$12,699,174) from sales taxes. In contrast, Kinloch, Bel-Ridge, and Country Club Hills all have poverty rates above 40% and levy some of the highest residential property tax rates in the region, ranging from 1.0 to 1.426.

The previous example is far from an anomaly. The 16 wealthiest municipalities in the St. Louis region, all of which have median household incomes in the six figures, collected \$44,461,884 in sales tax revenue in 2014, accounting for 46.7% of their municipal revenue. That 46.7% is a full 10% more than the 36.7% regional average, which is itself high. For further context, these same 16 municipalities only collected \$7,268,028 in property taxes.

Just as many poorer municipalities utilized their courts to fund local government, many municipalities seek revenue through sales taxes. Both represent a politically expedient way to raise local municipal funds through a large municipal pool while increasing services at no direct cost to constituents. Two examples of this practice can be found in St. Ann and Edmundson. At one time, St. Ann was home to Northwest Plaza, the 27<sup>th</sup> largest mall in the United States, which brought sales tax revenue into the city. However, the mall slowly declined and closed in 2010. In response, St. Ann began running radar traps on I-70 near the airport and saw its revenue from court fines and fees reach \$3,415,671, or 37.47% of its general revenue, in 2013, while property taxes accounted for only \$360,746 in the same year.<sup>6</sup> The City of Edmundson offers an even more recent example of the pursuit for external funding sources. In 2013, the City of Edmundson collected \$559,465 in municipal fines and fees, 34.86% of its general revenue. The focus on collecting traffic fines was made clear in a letter from the Mayor to the Edmundson police, reminding them that the fines they collected through citations would affect their pay pool.<sup>7</sup> Following the passage of Senate Bill 5, which lowered the amount of money municipalities could bring in from traffic fines, Edmundson quickly passed two measures. The first raises the fees for rental cars in Edmundson, which neighbors the airport. The second is an increase in the commercial property tax. When surveyed by the League of Women Voters, the city stated that it needed “the increased revenue to make up for the loss of monies from traffic fines following the changes from state reform.”<sup>8</sup> No corresponding hike was issued for residential property taxes in Edmundson.

As mentioned earlier in this report, the St. Louis region spends \$714.95 more per capita on municipal services than Louisville. A simple review of how the St. Louis region generates revenue for municipal services highlights how such a significant overspend can come to be, through the lack of a direct cost to citizens for the services they receive and a corresponding absence of difficult conversations centered on the fragmentation of the St. Louis region and the need for reforms. Certainly, there are appropriate uses of a sales tax, especially for regional initiatives from which all parts of the region would benefit. However, the current intra-regional competition for sales tax revenue to be used for hyper-localized municipal purposes is in need of reform, whether via a regional or state cap on sales taxes as in Indiana, Kentucky, and formerly in Missouri, or through an improved mechanism for distributing the economic successes of the region in a more equitable manner across all communities.

## EXPENDITURES ACROSS THE ST. LOUIS REGION

The following table provides the total expenditures for St. Louis City, St. Louis County, and the 90 municipalities within St. Louis County. In addition, the top three expenditures for each municipality are provided. This table is meant to serve as an overview of what the collected revenues discussed in the previous section provide to citizens in the St. Louis region.

The above table reinforces the findings of Better Together’s previous reports on police and fire protection, which highlighted the significant costs associated with the fragmented structure of the 43 fire departments and 58 police departments that operate in the St. Louis region. Fifty-three municipalities listed fire protection, police, or public safety overall as their top expenditure, with an additional twenty-six municipalities having one of the three as their second-largest cost.

What the data also shows is that, as discussed in the previous general administration report, general administration is costly in the St. Louis region. As mentioned, a Louisville-Jefferson County resident pays \$126.73 per capita in general administration costs, which is \$86.43 less per capita than in the St. Louis region. While Louisville-Jefferson County has 83 municipalities, it also has a consolidated regional government<sup>9</sup> that handles much of the administrative functions that the St. Louis region divides among 92 local governments. As a result, an incredibly inefficient and costly structure for general administration has developed in the St. Louis region. As the table shows, 11 municipalities count administration as their top expenditure, above public safety or any other municipal service. Twenty-six municipalities count administration as their second largest expenditure. This data presents an explanation for the high regional cost of the basic infrastructure of government, when it is fragmented to the degree it is in the St. Louis region.

Louisville Metro provides an excellent model for cost savings by serving as a “central clearinghouse” for most of the administrative duties that are required in a large region but that are scattered across 92 entities in the St. Louis region. Further, Louisville-Jefferson County is similar to St. Louis in that it is home to a great many municipalities. However, those municipalities, along with Louisville Metro, have created an efficient, collaborative system that has resulted in population growth and reduced government spending.

### RECOMMENDATIONS

The St. Louis region must have difficult conversations about the manner in which its governments function. A declining population base (more than 45,000 residents left between 2000 and 2010) as well as an antiquated regional governance structure that was cobbled together over two centuries are worthy of such discussions, as are our examples of best practices and reforms, including:

- Revising the sales tax system, so that the St. Louis region can focus on external economic competition rather than utilizing time, energy, and resources on intra-regional economic competition for sales tax revenue. This could be accomplished through a regional or statewide sales tax rate like that of Louisville and Indianapolis, amongst others.
- Addressing the regional overspend on administrative costs in St. Louis. Breaking the administrative functions of a region into 92 entities governed by over 52,000 pages of ordinances is not effective or efficient. Louisville Metro is a strong example of regional collaboration around governance, particularly administration. They have streamlined

processes and just recently announced a 2015 budget surplus of \$18.9 million.<sup>10</sup> Mayor Greg Fischer directly attributed \$12.6 million of that savings to efficiencies in government.<sup>11</sup>

These possibilities are just two of the many that have the ability to create a stronger and more equitable region that understands that “free tree trimming and leaf pick-up” or the absence of a property tax actually just means someone else is picking up the tab. If St. Louis is to truly thrive, a mere shuffling of the deck chairs cannot be labeled economic development, and a passing of the buck cannot be deemed good governance. St. Louis must strive towards a structure that truly allows St. Louis City, St. Louis County, and the 90 municipalities therein to act and succeed as a region. It is the only path towards growth and success.

## **General Administration #2 – Appendix**

**December 2015**

TABLE 1

CLASSIFICATION	POPULATION REQUIREMENT	LEGISLATIVE BRANCH	EXECUTIVE BRANCH	MUNICIPAL GOVERNMENT POWERS
Charter Cities	None	Established and governed by charter.	Established and governed by charter.	"Any city which adopts or has adopted a charter for its own government, shall have all powers which the general assembly of the state of Missouri has authority to confer upon the city, provided such powers are consistent with the constitution of this state and are not limited or denied either by the charter so adopted or by statute. Such a city shall, in addition to its home rule powers, have all powers conferred by law" (Missouri Consitution Art. VI, 19(a)).
3rd Class Cities	3,000 - 29,999	<p>Mayor-Council: not less than 4 wards, each of which has one two council members.</p> <p>Commission: Two or four council members, elected at large to four year terms.</p> <p>City Manager: Two forms: (1) five council members, elected at large for three year terms, one selected by the others to serve as mayor for a one year term. (2) seven council members, one from each of the five wards and two elected at large.</p>	<p>Mayor-Council: Mayor elected to four year term. City Administrator available to this form of municipality.</p> <p>Commission: Mayor elected to four year term.</p> <p>City Manager: Mayor selected from among city council to serve, city council employs administrative head of city government as City Manager.</p>	<p>Both Mayor-Council and Commission: City divided in five departments (public affairs, accounts and finances, public safety, streets and public improvement, parks and public property) and responsibilities for those departments is divided among the mayor and commissioners (RSMO 78.060).</p> <p>City Manager: The council retains the duty to pass all ordinances conducive to the welfare of the city. The Council shall also provide for all offices and positions necessary to the City Manager to carry on the work of the city (RSMO 78.570). The City Manager shall be the administrative head of the government subject to the direction and supervisions of the council. It is the City Manager's job to make sure that all laws and ordinances are enforced, to exercise control of all departments and divisions of the city, to prepare and submit an annual budget (RSMO 78.610).</p>
4th Class Cities	500 - 2,999	Board of Aldermen: two aldermen per ward, at least two wards. Two year terms, four years if approved by voters.	Mayor, elected to a two or four year term. City Administrator available to this form of municipality	The Board of Aldermen shall "have the care, management and control of the city finances and shall have power to enact and ordain any and all ordinances not repugnant to the constitution and laws of this state," further the city is able to legislate on keeping the peace in the community, regulating businesses, public health, and general good government (RSMO 79.110.1). Those powers also include zoning powers and the ability to address public safety concerns too (RSMO 79.450.1).
Villages	Fewer than 500	Board of Trustees	Chairman	<p>The Board of Trustees is granted statutory authority to pass ordinances in more than 40 specified areas (RSMO 80.090), may are very specific but generally fall in to some broad categories:</p> <ul style="list-style-type: none"> <li>- power to license and regulate merchants</li> <li>- some public health powers</li> <li>- zoning</li> <li>- fire protection, police</li> <li>- power to tax</li> <li>- power to provide for public infrastructure</li> </ul>
